# SHIPPING & RECEIVING MANAGEMENT

## Incoming Soil Tracking

- ◆ Use LinenTech's web-based touch screen system to track soiled linen items & linen weight received from the customers.
- ◆ Print bin tickets based on items/weight of each cart received.
- ◆ Print & Save receiving manifests to maintain a detailed record of items/linen weight received from customers.
- ◆ Daily/Weekly received items/weight reports for each customer

## Outgoing Shipment Tracking

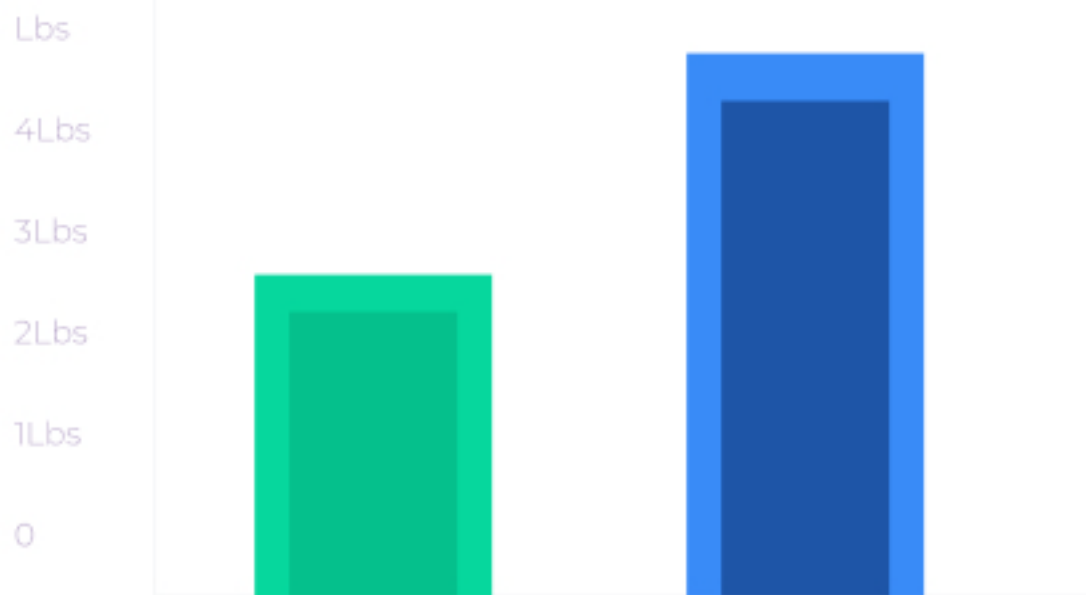

- ◆ Use LinenTech's interactive Shipping Dashboard to keep track of every shipment sent to the customer.  
Maintain a complete record of items & weight processed and shipped to your customers.
- ◆ Key in each cart's data (items & weight) through an easy to use touch-screen interface.
- ◆ Get weight directly from the scale or enter it manually in the system.
- ◆ Print bin tickets based on the content and weight of each cart.
- ◆ Create delivery manifests to go out with each shipment. Print a copy of the manifest or simply get it signed on your phone/tablet and email it to your customer.
- ◆ Reconcile your soil versus clean linen weight for each customer to calculate the variance.

# BILLING AND INVOICING

## Soil Vs Clean weight Reconciliation

All Customer ▾ Today ▾

## Revenue for Jul

Specialty: \$3,909.28  
Rental: \$517.05  
By Weight: \$520.06

[VIEW DETAILS >](#)

## Invoices

Due this Week

[VIEW DETAILS >](#)

- ◆ Bill your customers by weight, by piece count, or use combination pricing where you bill some items by weight and others by piece.
- ◆ Setup completely separate pricing for each customer.
- ◆ Very quick and simple invoice creation process.
- ◆ Email invoices to all your customers through one click of a button.
- ◆ Completely Automate your invoice creation and emailing process.
- ◆ Post payment against invoices.
- ◆ View your aging receivable report.
- ◆ Export invoices to accounting software including Quick Books, Sage Pay, etc.
- ◆ Email your customers their weekly/monthly customer statement.

## Complex Billing Options

- ◆ Charge 'multiple' pricing per pound processed for a customer.
- ◆ Multiple pricing options for various departments of the same customer.
- ◆ Invoice customers for preset inventory par levels or set minimum billable item quantities.
- ◆ Bill for soil linen weight rather than processed weight.

# LINEN RENTALS + ORDERS MANAGEMENT

- ◆ Mobile App (Tablet/Phone) to enter and fulfill all your customer orders.
- ◆ Set inventory par levels for your customers.
- ◆ Set one time or recurring orders for your customers.
- ◆ Using the mobile app, create delivery manifests and invoices on customer location based on the actual item quantity delivered.
- ◆ Bill your customers on par level quantities or actual quantities delivered.
- ◆ Set minimum billable item quantities.
- ◆ Preset item replacement charges.
- ◆ Pre-bill your customer and allow your driver to edit invoice at the customer location, in case of a change in item quantity delivered or any additional charges/discounts.
- ◆ Allow your drivers to post payments against the invoices.
- ◆ View your daily payments received reports.
- ◆ View the daily delivery schedule for each route using your mobile app.
- ◆ Set replacement charges for items.
- ◆ Post any additional charges/discounts to delivery manifests/invoices.
- ◆ View your daily packing report by route/customer.
- ◆ Set your production plan based on customer orders.
- ◆ Electronic proof of service with signature capture on manifests and invoices.
- ◆ View your daily route settlement report.
- ◆ Customer portal designed for your customers to enter orders directly in the system.
- ◆ Get live updates on the status of each customer order.

# PICKUPS AND DELIVERY MANAGEMENT

## Pick Up

- ◆ Assign Linen Pick-ups to your drivers via the admin portal.
- ◆ Set one-time or recurring schedules for pick-ups.
- ◆ The driver can view the pickup schedule on their mobile app At pick up stage driver can scan all carts/bags they are picking up from the customer If the carts/bags are not barcoded the driver can simply key in the quantity without needing to scan them.
- ◆ The system generates a pick-up manifest that can be signed by the driver and manager at the client location.
- ◆ Email the pickup manifest directly from your phone.

## Delivery Management

- ◆ Assign deliveries to drivers with or without creating delivery routes.
- ◆ Create one time or recurring delivery assignments for drivers.
- ◆ Drivers are able to view daily delivery assignments on their mobile app.
- ◆ System generates a carts load sheet for the drivers.
- ◆ Drivers can be required to scan all carts/bags assigned to them before leaving the plant.
- ◆ This ensures they are not missing any carts or bags for delivery.
- ◆ Drivers can get manifests signed digitally or simply take a time-stamped and geo-tagged picture at the time of delivery using their mobile app.
- ◆ The manifests can then be emailed to the client.

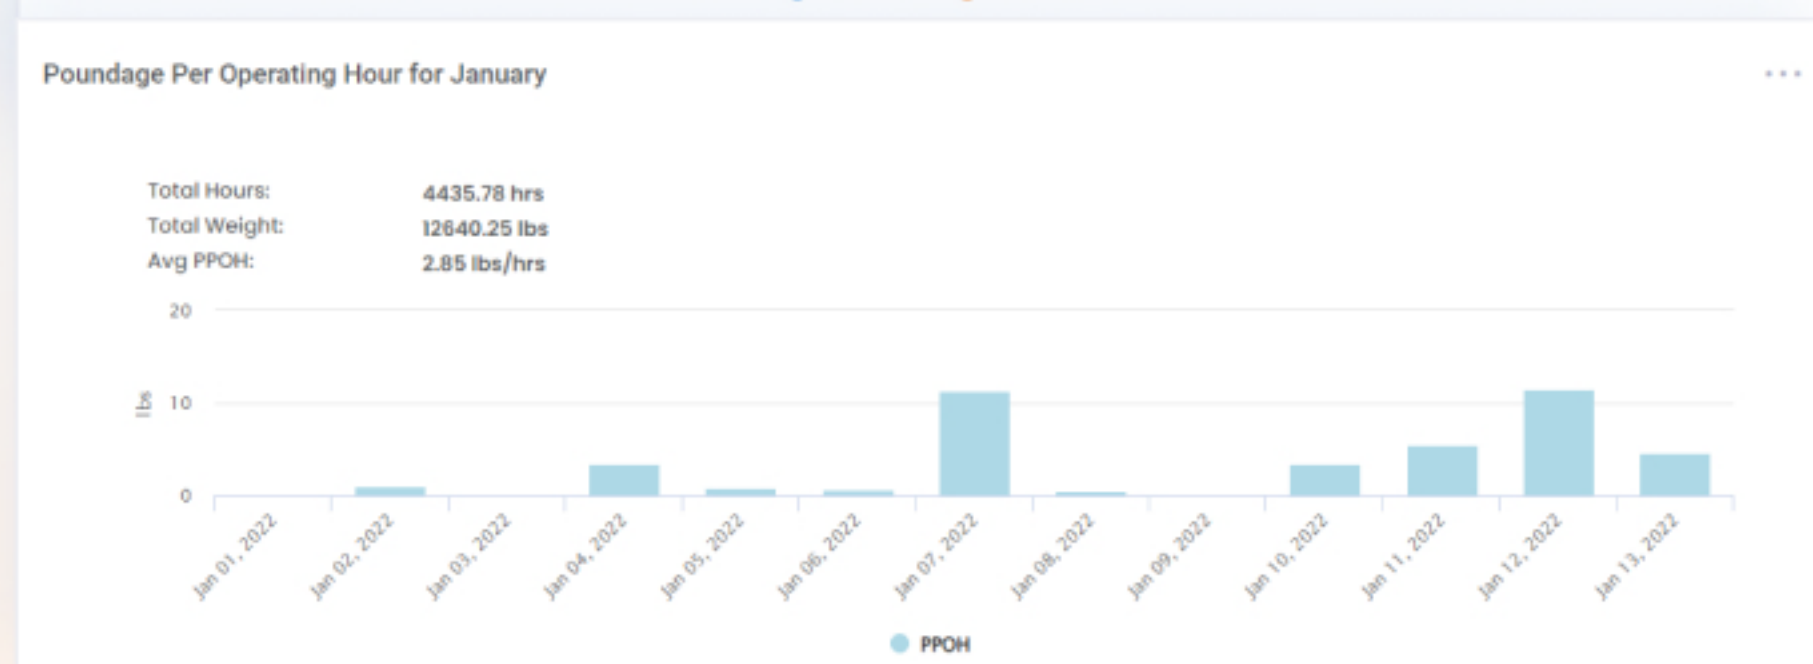

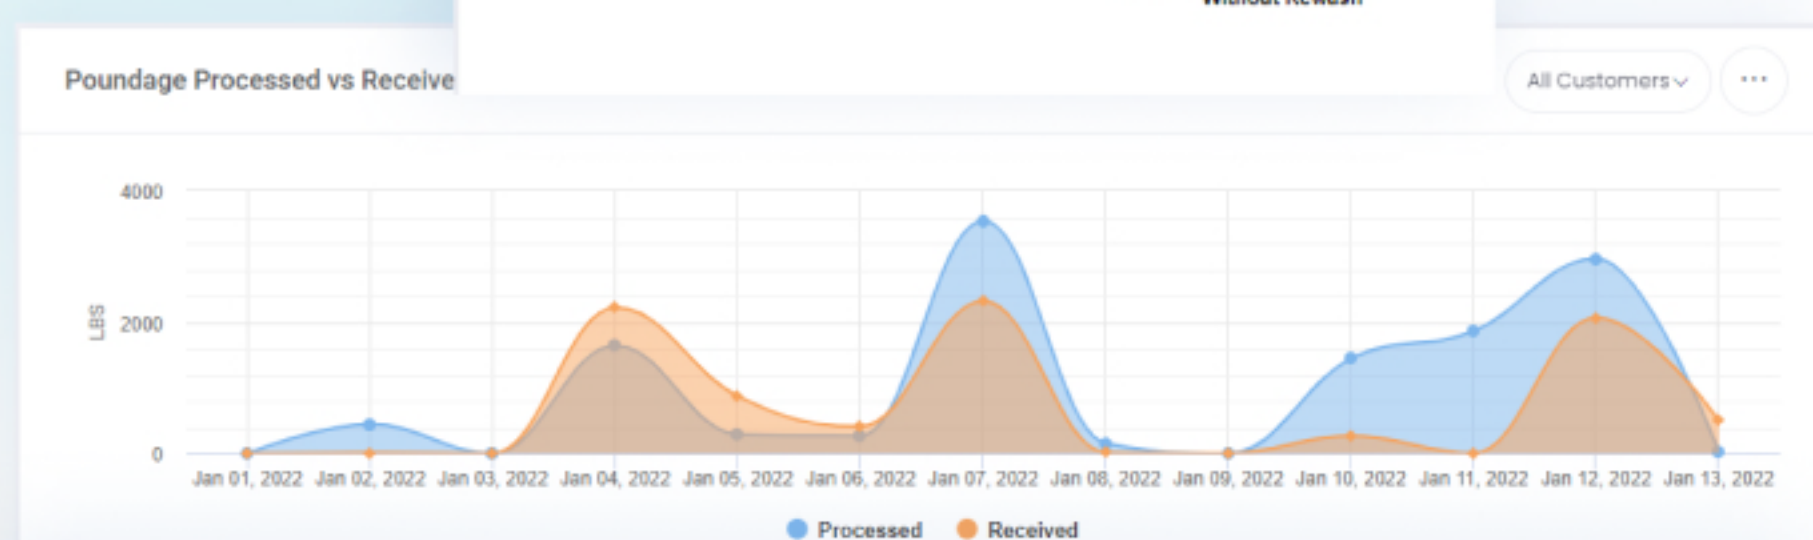

# REWASH & SPECIAL HANDLING

## Rewash & Stain Treatment

- ◆ Maintain a complete record of items and weight of linen processed as Rewash or Reclaim A
- ◆ complete history of Items/Weight of Linen Retained by laundry for Rewash/Reclaim
- ◆ Track linen rewashed and processed and shipped to each customer.
- ◆ Charge separate pricing for rewash/stained items (Optional).

## Discarded Items

- ◆ Maintain a complete history of Rejected items and weight of linen by each customer

# TRACKED CARTS

- ◆ Use LinenTech's barcode system to check in and check out your carts.
- ◆ Always know the exact location of your carts by running a 'carts location report'

# LINENTECH REPORTS

LinenTech has a great range of built-in reports covering wide spectrum of the industrial laundry business operations. What makes the system unique is the option for users to add new reports to the system as per their requirements.

LinenTech's reporting module provides laundry managers, supervisors and owners most pertinent data through the LinenTech Web Portal or on their mobile using LinenTech Smart App.

# PPOH AND LABOR COST TRACKING

- ◆ Integrate LinenTech with your Time & Attendance System Get your Poundage Processed Per Operating hour in RealTime.
- ◆ Know your actual amount of labor cost per pound of linen processed Real time graphs to compare your bench mark versus your actual PPOH and labor cost

# LINENTECH SMART

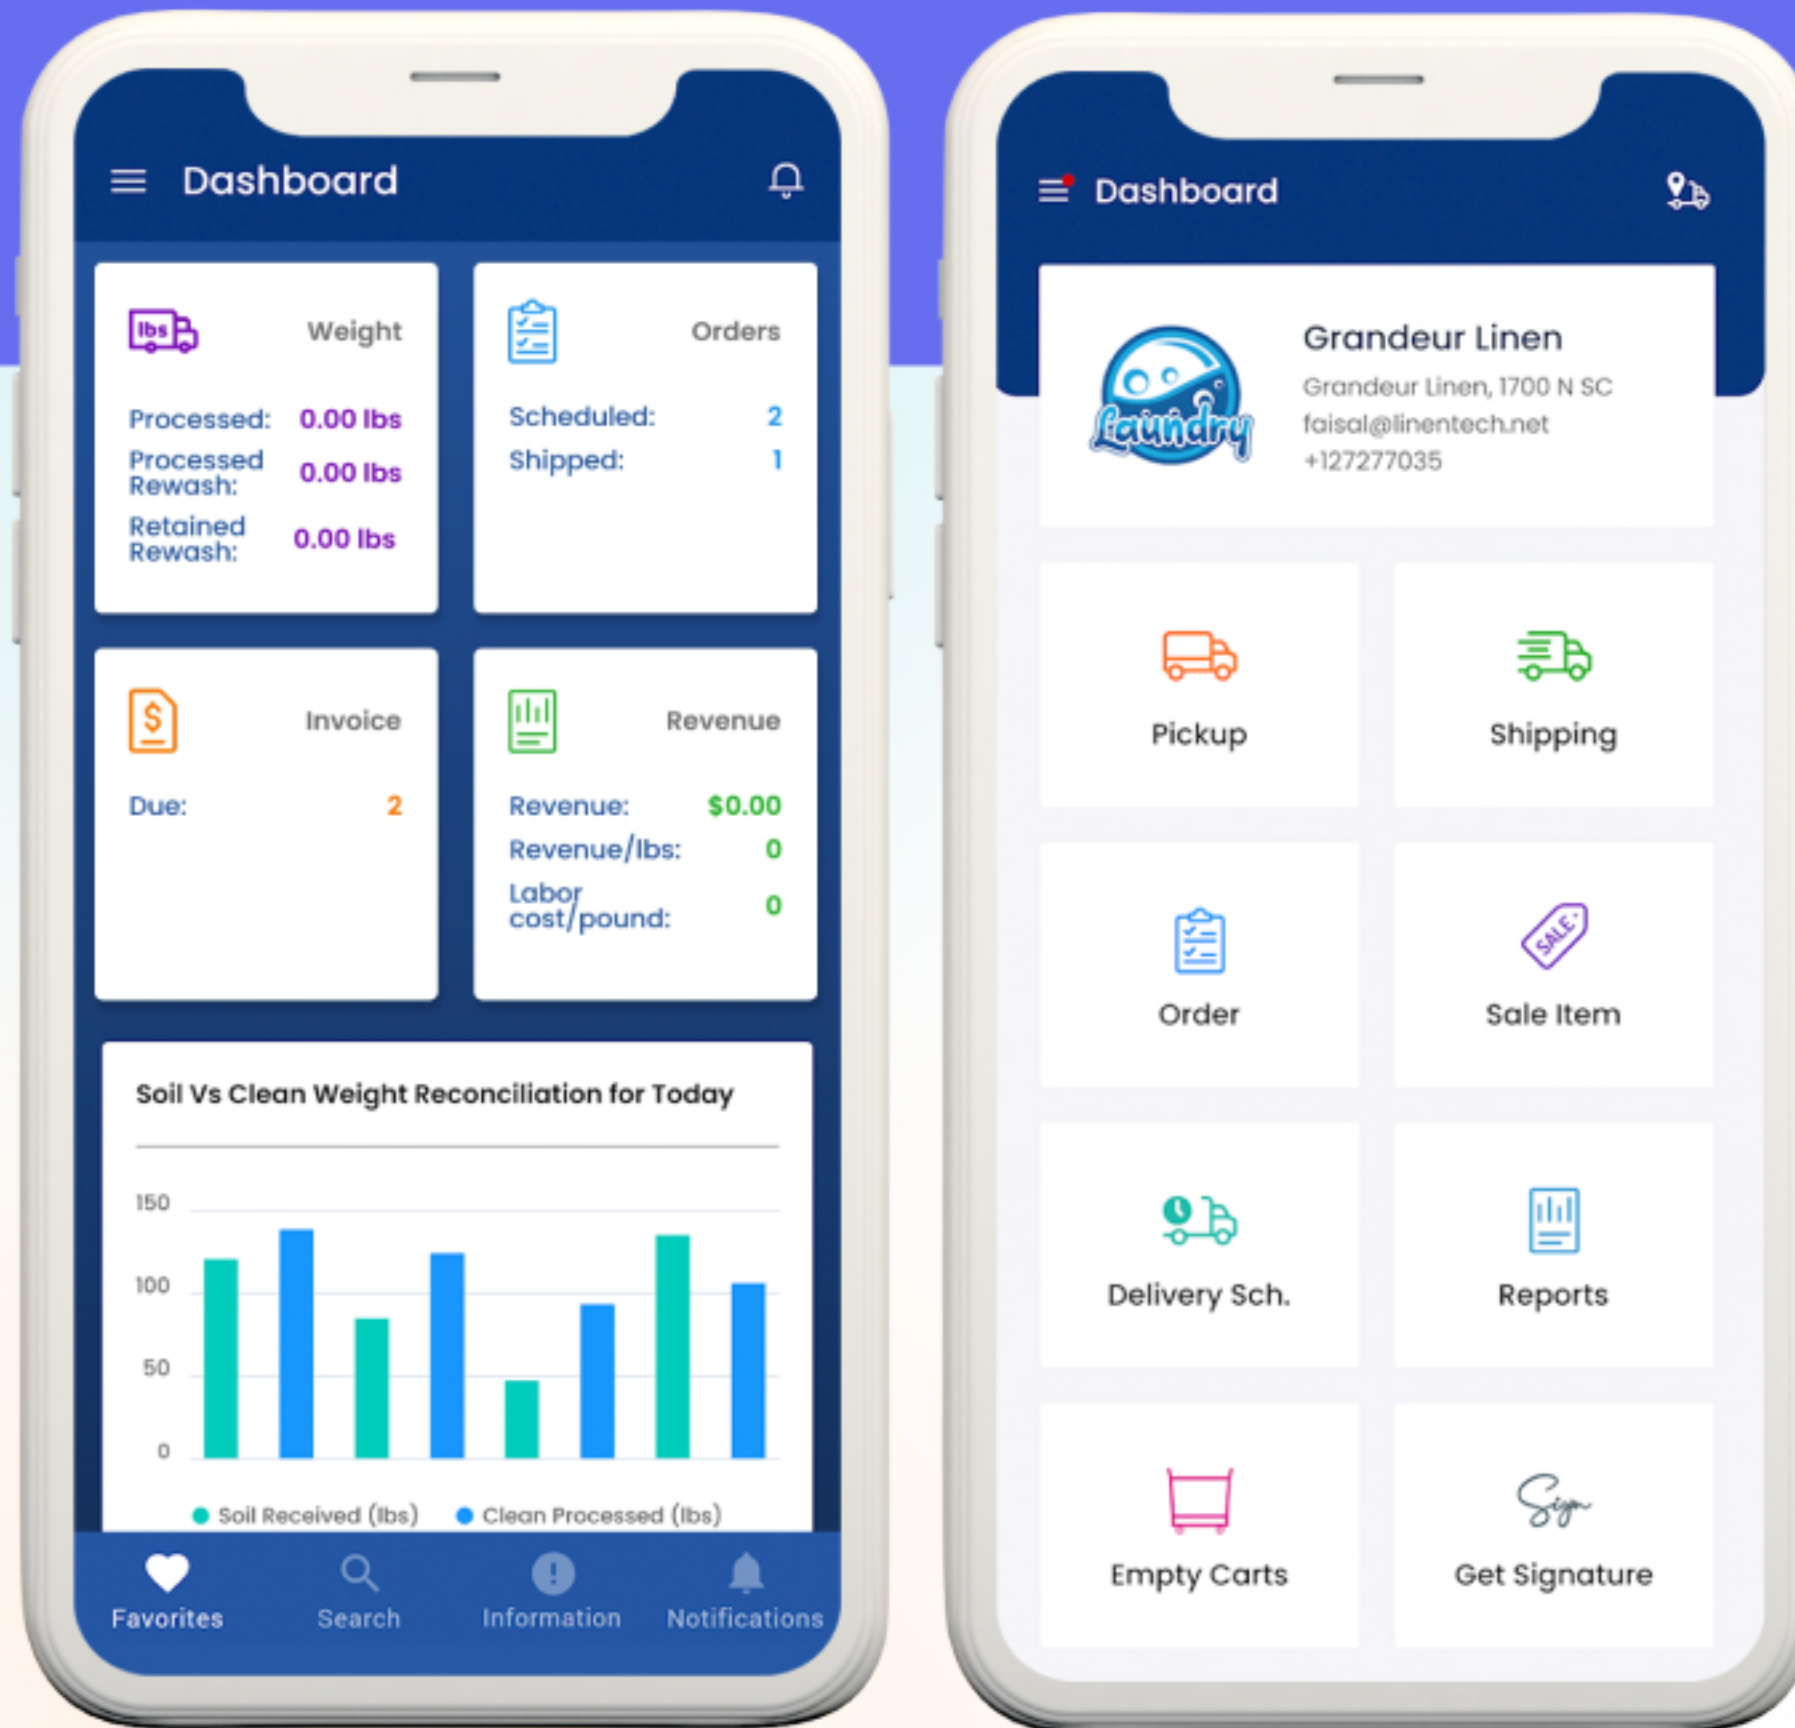

With the LinenTech Smart mobile app for managers, you can now have access to all the key laundry data and reports on your mobile device. Real-time data including processed items, processed weight, orders management, weight reconciliation, rewash, invoices, receivables, etc. are now at your fingertips with the LinenTech Mobile App

With LinenTech Smart, now you can also email invoices, manifests, and other key reports to your customers from your mobile device. The manager also gets live notifications on various activities like linen pickup, drop off, dispatch, etc.

## LinenTech Smart – Customer Access

Laundries can give each of their customers' access to the mobile app, with access to reports and data relevant to that customer. Customers will only be able to view the reports and data, laundry admin has given them access to.

Some of the reports you can allow your customers access to are Rewash, Processed (Shipped) items, Processed (Shipped Weight), Weight Reconciliation, Delivery Manifests, Invoices, Customer Statements, etc. Besides the above mentioned, laundry can give its customers access to any report available in the system.

# LINENTECH DRIVER – MOBILE APP

## With LinenTech's Driver app, the laundry drivers have access to following features

- ◆ View daily pickup and delivery schedule for the routes assigned to them.
- ◆ View packing list by each customer.
- ◆ Get the delivery manifests and pickup manifests signed on their phone or tablet. Email the signed delivery manifests to customers from their phone.
- ◆ Laundry manager can track the exact time of linen delivery/pick up for each customer.
- ◆ Scan carts being picked up from the customer location. Laundry manager will immediately get an SMS as well as app notification with the number of carts being picked up from the customer location.
- ◆ Complete rental order management by restocking par levels, creating delivery manifests, and invoicing customers using the phone or tablet.
- ◆ Make it mandatory for the driver to scan all carts at the time of delivery for each customer.
- ◆ Using this feature, you can ensure that customers receive the exact number of carts that left the plant and also that customer A does not receive carts for customer B.

## Delivery Route Management and Location Tracking

- ◆ Create routes and schedule linen pickup and delivery for each route.
- ◆ Assign drivers to delivery routes.
- ◆ Track time linen was dropped off and picked up from each customer location.
- ◆ Generate packing reports for each delivery route.
- ◆ Always know the exact location of your drivers on the manager app

## SMS Alerts and Live Notifications

Plant operators and drivers can now send system generated SMS and App notifications to the customers when the linen leaves the plant. SMS notifications include the time linen leaves the plant and a link to the delivery document with complete details on item quantities, linen weight, and the number of carts.

Plant manager can also receive System Generated Mobile App and SMS notifications when the driver picks up carts from the customer location. The plant manager gets complete details on the number of carts being picked up and the pickup time
